
Evaluating Acceptable and Privacy-preserving Text Replacements

Hello! Thank you for taking the time to participate in our survey.

Please read the instructions below before proceeding!

In the following, we have prepared a series of questions that aim to evaluate candidate *replacement* texts for originally user-generated texts. We are asking you to judge which of these replacements best fulfill the following two primary dimensions:

- (1) **Preserves meaning**: the replacement text should *generally* carry a similar meaning to the original text. This must not be exact or even pretty close, but should be somewhat semantically reminiscent of the original. This does not mean that the replacement text needs to contain the exact names, places, etc. of the original text, but *should* talk about the same general topic and with a similar tone, even if some new ideas or concepts are introduced.
- (2) **Preserves privacy**: the replacement text should mask any identifiers or sensitive information from the original text, whether this be direct, indirect, or implied sensitive/personal information.

The survey is based on four original texts. For each of these texts, you will be asked a series of two kinds of questions: the first asks which of the candidates are acceptable replacements (based on the above criteria, choose as many as you see fit), and the second asks which is the *best* candidate (pick one).

Thank you very much in advance, and we hope you enjoy taking the survey!

WARNING: you will see a lot of “noisy” and potentially non-coherent texts. This is normal! Please also be warned that some explicit language may be included in the candidates.

Please enter your Prolific ID: [ID Number]

Part 1: Choosing all acceptable replacement candidates . Given each of the below original texts, which of the provided choices do you believe are *acceptable* replacements that **respect the original meaning** (generally) but also **mask any private information**?

Reminder: choose all that apply! If no candidates are acceptable, choose the “NONE” option.

[NOTE: The response options below were presented in a random order.]

- ☐ [DP Rewritten Text]
- ☐ [PP-Flan-Mech Text]
- ☐ [PP-Flan-Full Text]
- ☐ [PP-Features-Base Text]
- ☐ [PP-Features-Adv. Text]
- ☐ NONE

Part 2: Choosing the best replacement candidate. You will see another series of questions with similar texts as before. Now, please select the best replacement candidate out of the provided choices, regardless of your choices in the previous section.

[NOTE: The response options below were presented in a random order.]

- ☐ [DP Rewritten Text]
- ☐ [PP-Flan-Mech Text]
- ☐ [PP-Flan-Full Text]
- ☐ [PP-Features-Base Text]
- ☐ [PP-Features-Adv. Text]

Thank you! This completes the survey. Please make sure to submit in order to receive your completion code.
